1. ~~Comment.~~ The volume of incoming supply traffic observed at the Satskorn ration supply depot in January 1955 totals 502 cars which is slightly below the monthly average of 521 cars on 1954. The report clearly indicates that most of the ration supply for the Soviet Forces in the GNR arrives from the USSR. Flour and cereals from the GNR are probably only processed at local installations from grain which has been supplied by the USSR.

25X1

2. ~~Comment.~~ The commercial section of the Fourth Gds Mech Army in Eberzville is reported for the first time as consignee at Satskorn. The commercial section possibly has a branch at the Satskorn ration supply depot.
